Statement of significant changes

July 2021

Pure knowh₂ow

South East Water

Statement of significant changes

Overview

The purpose of this statement is to provide our stakeholders with information on any proposed changes to our tariff structures for 2022/23. This information is provided in accordance with the wholesale charging rules issued by Ofwat. It relates to wholesale charges that we apply to retailer (water supply licensees).

We will publish indicative wholesale charges for 2022/23 in October 2021.

Changes to our tariff structure

We are proposing to discontinue the non-household super economy tariffs as of 1 April 2022. For the small subset of customers who are currently charged on the basis of this tariff, it is proposed to apply instead our existing block tariff designed for large non-household water users.

We plan to undertake retailer consultation activities to determine appropriate handling strategies to mitigate any customer impacts. Analysis has already been completed to ensure there will not be an increase of over 5% in charges to the existing super economy customers if their charges were based on our block tariff.

Stakeholder engagement

We continue to welcome feedback and comments from retailers and other stakeholders with regard to the structure and content of our tariffs to inform future strategy.

Please send your observations or queries in relation to this proposal to:
